## Objective

---

I am a Software Engineer seeking a position as a backend or full-stack developer. I am passionate about creating intuitive, user-friendly software solutions. The ideal position is one where I can use my critical thinking skills and programming experience to solve complex problems for clientele.

## Skills & Technologies

---

**Languages:** Java, Go, SQL, Python, TypeScript, JavaScript

**Technologies:** AWS, Linux, Git, MySQL, Gradle, Maven, Spring, React, Docker, Kubernetes

**Tools:** Github, Jenkins, Kibana, Teamcity, Splunk, Grafana

## Experience

---

### Apptio

**Louisville, CO**

*Software Development Engineer II*

*August 2017 – Present*

- Completed full-stack development focusing on IT finance and management software
- Built and maintained various features for customers in both team and solo environments
- Designed and implemented large-scale architecture improvements and refactors
- Implemented microservice aggregating Reserved Instance and Savings Plan data for visualization
- On-call experience with deploying and supporting live production environments and customer issues

### Advanced Micro Devices

**Fort Collins, CO**

*Verification Co-Op Engineer*

*May 2016 – August 2016*

- Performed functional level verification of next generation microprocessors
- Verified pre-silicon core-level operations using many languages
- Wrote and debugged RTL verification builds, simulations, and regressions
- Reorganized top level block structure

## Education

---

### University of Colorado

**Boulder**

*Computer Science - Bachelor of Science*

*Fall 2013 – Spring 2017*

Minors: Mathematics, Economics

Honors: Cum Laude, Dean's List, CU Esteemed Scholar

## Interests

---

**Certifications:** AWS Certified Developer Associate

**Competitions and Mentoring:** HackCU, T9 Hacks, Google Games
