Objective

I am a graduating Computer Science undergraduate seeking a position as a Software Engineer. I am passionate about creating intuitive, user-friendly software solutions. The ideal position is one where I can use my critical thinking skills and programming experience to solve complex problems for clientele.

Skills & Technologies

Languages: Python, C++, Java, C, SQL, Javascript, Ruby, Perl

Technologies: Linux, Git, MySQL, Firebase, Jira, Perforce

Experience

Advanced Micro Devices   **Fort Collins, CO**

Verification Co-Op Engineer   *May 2016 – August 2016*

- Performed functional level verification of next generation microprocessors
- Verified pre-silicon core-level operations using many languages
- Wrote and debugged RTL verification builds, simulations, and regressions
- Reorganized top level block structure

University of Colorado   **Boulder, CO**

Identity and Access Management Student Assistant   *July 2015 – May 2016*

- Provided access to necessary resources and applications to both individuals and groups
- Created scripts to improve workflow and productivity
- Managed secondary accounts (e.g. Student groups, organizations, departments)
- Assisted with the transition to a new Identity and Access Management system

Education

University of Colorado   **Boulder**

Computer Science - Bachelors of Science, GPA: 3.68   *Fall 2013 – Spring 2017*

Minors: Mathematics, Economics

Honors: Dean's List, CU Esteemed Scholar

Interests

Competitions: Google Games, HackCU, Collegiate eSports

Projects: Last Words mobile application, BuffBurgers mobile application
